January 22, 2020

President Donald J. Trump  
The White House  
Office of the President  
1600 Pennsylvania Avenue, N.W.  
Washington, D.C. 20500

Dear President Trump,

At the beginning of the fourth year of your first term as President of the United States of America the undersigned organizations, representing millions of Americans, wish to thank you for all you have done to protect the dignity of human life.

As a candidate, on January 23, 2016, you stated, “Let me be clear – I am pro-life.” As President, you have lived up to that statement in standing up for women and the unborn:

- Reinstated the Mexico City Policy to end Federal funding of foreign non-governmental organizations providing family planning abroad if they perform or actively promote abortion as a method of family planning. Expanding policy to more than $8 billion in global health assistance provided by all Federal departments and agencies.
- Placed pro-life personnel throughout your Administration, including in key roles.
- Nominated 185 Federal judges confirmed by the Senate who will uphold the United States Constitution, including two Associate Justices of the Supreme Court.
- Wrote Statements of Administration Policy in support of the following pro-life bills:
  - Pain-Comparable Unborn Child Protection Act.
  - Born-Alive Abortion Survivors Protection Act.
- Published a regulation to prevent the commingling of taxpayer dollars funding the Title X family planning program with projects that perform, promote, or refer for abortion as a method of family planning while allowing Title X family planning grantees to exclude, as subrecipients, organizations that perform or promote abortions. As a result, your Administration funded 16 new organizations as Title X grantees, including State health departments, faith-based organizations, and several community health centers and prevented further subsidizing of the billion dollar abortion industry.
- Allowed State Medicaid directors more flexibility to set qualification standards for Medicaid providers, including requirements that may exclude abortion providers from the Medicaid program.
- Ended HHS funding for new medical research using human fetal tissue obtained from elective abortions, unless authorized by an ethics advisory board. This ends government experimentation with aborted children and increases human subjects protection for any future research.
- Reissued guidance, Interaction of the Emergency Medical Treatment and Labor Act (EMTALA) and the Born-Alive Infants Protection Act of 2002, that hospitals may be
required to screen, stabilize, and treat or transfer “every infant who is born alive, at any stage of development” including those born alive after abortions.

- Issued guidance to clarify that a hardship exemption from the Obamacare individual mandate is available if all affordable plans offered through the Federal exchanges in an individual’s area include abortion coverage, contrary to one’s beliefs.
- Issued final rules protecting religious orders, pro-life organizations, and other organizations and individuals that have religious or moral objections to providing coverage for contraceptives, including those they believe cause early abortions, in their health insurance plans.
- Proposed regulations on Obamacare to protect life and conscience, including:
  - Requiring Obamacare insurers to issue separate invoices for insurance coverage of abortions.
  - Requiring Obamacare insurers with plans covering abortions to offer at least one identical plan in the same geographic area that does not cover abortions. (The rule would not apply in States with mandated abortion coverage.)
  - Reversing Obama Administration’s efforts to force recipients of certain Federal funding to provide or pay for abortions.
- Provided guidance to Federal departments and agencies on Federal Law Protections for Religious Liberty.
- Issued clarifications on separate payments for abortion in the health care exchanges.
- Created the Conscience and Religious Freedom Division within the HHS Office for Civil Rights, which:
  - Issued a final rule to strengthen enforcement of Federal laws protecting the conscience rights of healthcare workers and entities; and enforced Federal laws protecting conscience rights against laws adopted by the States of California and Hawaii that had required pro-life pregnancy resource centers to refer clients for abortions.
- Opposed efforts at the United Nations to make abortion an international human right.
- Advocated for the protection of women and children, born and unborn, as a global health priority, including by building a coalition of countries representing over one billion inhabitants.
- Issued a 2018–2022 Strategic Plan that recognizes a core component of HHS’s mission: to serve and protect all Americans “at every stage of life, from conception” and to advance global health security through respect for “the inherent dignity of persons from conception to natural death.”

As we move forward we look forward to further building a culture of life together!
Most Respectfully,
